## Boswellia/Turmeric Support

### DESCRIPTION

Boswellia/Turmeric Support delivers a complementary blend of standardized botanical derivatives to target underlying activities associated with development of minor pain, such as the production of hormone-like substances known as eicosanoids. It also provides vitamin C and lemon bioflavonoids to help protect connective tissues (joints, ligaments, tendons) from damaging free radicals.

### FUNCTIONS

Boswellia/Turmeric Support is a blend of select Ayurvedic herbs traditionally used to relieve minor pain, including boswellia, turmeric, and ginger. By inhibiting certain enzymes, these herbs support healthy, balanced eicosanoid synthesis. Inflammation Intensive Care also provides antioxidant protection by supplying a lemon bioflavonoid complex, quercetin, and vitamin C.\*

- Features an extract of boswellia, as well as turmeric and ginger--all premium quality and standardized to key compounds to ensure effectiveness, reproducibility, and consistent results.
- Provides cayenne, an herb that has long been prized for its many health benefits such as the relief of minor pain, which complements the activity of the other herbs.\*
- Offers added antioxidant support from quercetin.\*
- Provides excellent muscle tissue support and relief of minor pain following intense exercise or weekend warrior activities.\*

### INDICATIONS

This formula was designed for occasional or short-term use for active patients experiencing exercise-associated minor pain. Individual results may vary. For best results, follow your health care professional's guidelines.

### FORMULA

**Serving Size:** 1 Tablet

Ingredient Amount

Vitamin C (as ascorbic acid).....	100 mg
Boswellia (Boswellia serrata) Gum ....	206.5 mg
[standardized to 66.5% (137.25 mg) organic acids]
