

Preventive Medicine

Healthy Weight Support

Healthy Weight Support is a synergistic blend of nutrient and herbs designed to offer nutritional weight loss support.

FUNCTIONS

Glucose metabolism can be associated with abnormally high blood glucose leading to weight gain. Garcinia aids healthy blood glucose levels.

Gymnema sylvestre is an Ayurvedic botanical that may assist in the regeneration and repair of pancreatic beta cells. Gymnema is also helps reduce intestinal glucose absorption.

Bitter melon grows in tropical areas, including parts of East Africa, Asia, the Caribbean, and South America, where it is used as a food as well as a medicinal remedy. The fruit of this plant prevents excessive conversion of glucose from carbohydrate into body fat.

Garcinia cambogia, a tropical fruit grown in Asian rain forest area. Research also indicates that (-) hydrocitric acid plays an important role in the regulation of a normal appetite.

Alpha-lipoic acid is a fat- and water-soluble, sulfur- containing coenzyme. It functions in the body much like a B-vitamin, since it is involved in energy production.

Chromium is a component of the glucose tolerance factor (GTF), a naturally occurring compound of chromium, nicotinic acid, and amino acids that are essential for proper glucose metabolism. Adequate chromium nutrition is essential for the formation of GTF and subsequent control of blood glucose levels.

INDICATIONS

Garcinia for healthy weight loss support may be a useful dietary supplement for those who wish to control blood sugar metabolism.
