Beyond Balance MC-BAR-2™

MC-BAR-2™ is an immuno-supportive formula that may be helpful for those coping with tick-borne illness* Research shows that Sarsaparilla possesses immunostimulating properties and may assist in the regulation of a cytokine response.* It also has been shown to support the body's natural ability to fight various micro-organisms.*

Traditional medicine gives evidence that Lomatium may be helpful to boost immunity and reduce inflammatory responses.* Studies reveal Coptis may support the body's ability to fight parasitic activity.* Additional research indicates that Cordyceps may promote absorption of nutrients by the cells.* Many of the herbs in this formula, including Green Tea, may offer antioxidant support. MC-BAR-2™ is not a replacement for MC-BAR-1.* It is very important and highly synergistic.*
